Beach Plum  
Raribank  
(Formerly N. J. #1)  
For Fall (1949) and Spring (1950) Delivery

Description

Selection from wild near Old Bridge, N. J.; established on New Jersey Horticultural Farm No. 2 since 1932.

Large tree (as large as medium size peach tree), vigorous, purplish-red fruit, freestone, good quality. Has been very resistant to brown rot and free of Japanese beetle attacks. Makes excellent jelly, and can be canned as whole plums.

Ripens during early September at New Brunswick.

Prices

Order Blank

To the New Jersey Small Fruits Industry Committee  
c/o C. H. Steelman Fruit Nursery  
R. F. D. 3  
Princeton, New Jersey

I would like to place an order for the following beach plum trees:

<u>Variety/Selection</u>	<u>: No. Trees</u>
Raribank	:
N. J. 29*	:
N. J. 30*	:

- \* Pollinizers - The Raribank variety is self-sterile which necessitates inclusion of one pollinizer for orders of less than 10, or 10 per cent pollinizers for larger orders. N. J. 29 and N. J. 30 have blossomed with Raribank at New Brunswick and ripen at about the same time.

Liability Agreement

Great care is used to avoid mistakes, but in case any trees prove to be untrue to the name under which they are sold, the original order will be replaced or the amount actually paid for such stock at the time of purchase will be refunded. The purchaser agrees to accept the trees on these terms.
